

KNOWLEDGE TRANSFER DOCUMENTATION

Cancer Screening Data Management – Survey, Clinical & TCC
Chintamani Panchayat Project

A. Role & Responsibility

The Data Analyst is responsible for managing the complete data lifecycle from camp data collection to final upload in the Swasthya application. Responsibilities include data cleaning, validation, merging Survey + Clinical + TCC datasets, maintaining UHID uniqueness, validation checks, image handling, and preparation of final import files.

Check with the doctors for the camp plan

who gives data – Already uploaded in the Drive

who consumes output – After preprocessing, Send the data for import to Suresha sir

B. End-to-End Workflow

1. Camps conducted and data collected via Google Forms (Survey, Clinical, TCC).
2. Data exported from Google Forms into Excel format and saved in Raw Data folder.
3. Survey data cleaned (UHID validation, Age, Gender, Tobacco logic, Village mapping).
4. Clinical data cleaned as per template column order and screening logic.
5. Survey and Clinical merged using UHID mapping (4-digit format).
6. Validation performed using template alignment and validation software.
7. TCC data processed strictly for tobacco users (Alcohol-only rejected).
8. Gender mismatch checked using validation script.
9. Images downloaded using image script and removed from the output folder after extraction.
10. Final validated file sent for import with images.

C. Google Forms Documentation

Forms Used: Survey Form, Clinical Screening Form, TCC Form, Follow-up Form.-->which is Drive “data and software”

Access – Allowed

Common Issues:

- Missing Age

- Duplicate UHID
- Incorrect Phone Numbers
- Gender mismatch
- Tobacco frequency mismatch
- Wrong Village mapping

D. Excel Data Cleaning SOP

Raw File: Contains direct export from Google Forms without modifications. I don't have the Access for the forms directly access the excel data which is not clean [please check the Knowledge transfer file]

Folder structure (where files are saved)

Kanaka Ravi system → Documents → Kanaka → panchayat file /phase 1 and phase2 in Year on Year report → find out the files → software's /codes / template → separate the panchayat by panchayat.

Cleaned File: Template aligned, duplicates removed, standardized Yes/No values, date formatting corrected, tobacco logic applied, UHID formatted to 4 digits.

Validation Checks:

- ✓ Age mandatory
- ✓ Gender must be Male/Female
- ✓ Tobacco logic validated
- ✓ Doctor name not blank
- ✓ TccDoneBy column blank
- ✓ Alcohol-only cases rejected

E. Swasthya App Upload Process

1. Login to Swasthya application. (I DON'T HAVE THE ACCESS)
2. Select appropriate upload module. (DRIVE "data and software")
3. Upload validated Excel file.
4. Map Excel columns to Swasthya fields.
5. Run validation and confirm successful upload in the mail to suresha sir.

Common Upload Errors:

- Invalid Gender → Correct to Male/Female (gender mismatch code)
- Duplicate UHID → Recheck merged file (check with the clinical or survey vice versa)
- Missing mandatory fields → Contact field staff (survey details)

F. FAQ & Exception Handling

Incomplete Data → Contact field worker via Sarvarakshana WhatsApp group.

Wrong Location → Verify Panchayat list in Drive.

Survey Missing but Clinical Exists → Mark as 'Missing Survey' and escalate to the field workers.

G. Final Quality Checklist

Camp team leads – Dr.sunitha , Dr. Subhashree ,Dr. shruthi

Swasthya support – Suresha sir

Project manager / reporting authority – past 8 months Dr.Sanchitha chander after now, Suresha sir about the data import , camp plan to the Doctors.

Whom to contact for:

- o Form changes – survey missing □ Field workers text in the sarvarakshana whatsapp group
- o Data issues – Rather than missing there is no data issues which is deliberately rely.
- o App downtime – doesnot have the access for the APP.
