

Dear Team at Sri Shankara Cancer Hospital,

I thoroughly appreciate the work Shankara institutions are doing with a great commitment to the culture of Shankaracharya and duty towards people.

I am writing to express my interest in associating with your esteemed institution in a capacity that contributes to psycho-oncology, patient support, and caregiver engagement.

With a Master's degree in Psychology and certification as a Psycho-Oncology Coach, my work has been centered on supporting patients and families navigate the emotional and psychological dimensions of serious illness—moving from acceptance toward resilience and meaning.

Alongside my psychological practice, I bring over two decades of experience in leadership, advisory, and working with globally distributed teams across cultures. This dual exposure allows me to design structured yet humane interventions—whether through one-on-one coaching, caregiver guidance, or scalable micro-learning programs for emotional well-being. My signature approach, Techno-Psychological Change Management (TPCM), has been applied in both corporate and social contexts to enable behavioral adaptation in complex situations.

I would value the opportunity to contribute to your mission—either as a volunteer, consultant, or in a structured program role—supporting patients, caregivers, and clinical teams in strengthening the psychological dimension of care. I am happy to engage in a discussion to explore how my experience can align with your current or upcoming initiatives.

Warm regards,

Venkat Manthripragada

Psychologist | Psycho-Oncology Coach

Overview

Venkat holds a Master's degree in Psychology and is a certified Psycho-Oncology Coach, actively engaged in social initiatives spanning psycho-oncology and micro-learning programs. His journey reflects a rare blend of corporate leadership and entrepreneurship, enabling him to bring a distinctive perspective to psychology—one that seamlessly integrates organizational and technological transformation.

He is the creator of the signature framework, **Techno-Psychological Change Management (TPCM)**, designed to address complex challenges across both corporate environments and social systems. His approach is holistic, drawing from technology, business processes, management accounting, HR practices, and deep behavioral insight.

A seasoned people leader, Venkat has managed global, cross-cultural teams, combining strong governance with a sharp focus on adoption and measurable outcomes. He currently leads DigitalManthri Consulting, through which he delivers comprehensive solutions in business process transformation and enterprise applications.

Venkat actively contributes to thought leadership by writing and speaking on contemporary challenges, particularly around navigating change and AI adoption in the workplace. He is also the author of three books that explore deep philosophy, geriatric psychology, and the lived experience of an OCD patient.
