

ZAINAB ANJUM K

Cancer Biologist | Diagnostic Pathology Enthusiast | Research-Driven Professional

Bengaluru, Karnataka | 8147513205 | zainabanjumkareem@gmail.com | [linkedin.com/in/zainab-anjum-kb5a533293](https://www.linkedin.com/in/zainab-anjum-kb5a533293)

PROFESSIONAL SUMMARY

Dedicated, driven, and highly efficient student with a strong affinity for cancer biology and diagnostic pathology. Currently enrolled in Jain University pursuing a bachelor's degree in Cancer Biology (CGPA: 8.23). Equipped with hands-on laboratory experience in cytogenetics, histopathology, immunohistochemistry, and clinical diagnostics. Passionate about oncology research and disease mechanism understanding. Committed to advancing diagnostic pathology and contributing to precision medicine.

CORE COMPETENCIES

- **Laboratory Techniques:** Tissue preparation, staining, microscopy, slide preparation, embedding, trimming, sectioning, mounting
- **Cytogenetics:** Chromosome analysis, G-banding, culture setup, sample preparation, reagent preparation
- **Molecular Biology:** DNA extraction/isolation, PCR technique, gel electrophoresis, bacterial culture, streaking techniques
- **Diagnostic Procedures:** Phlebotomy, hematology analysis, biochemistry testing, flow cytometry, immunohistochemistry, cytology
- **Media & Reagent Preparation:** Culture media, hypotonic solutions, Carnoy's fixative, buffer solutions
- **Analytical & Observational Skills:** Microscopic analysis, detailed observation, protocol adherence, quality control

PROFESSIONAL EXPERIENCE

Intern - Diagnostic Pathology

Triesta Sciences (Unit of HCG NCHRI), Bengaluru, Karnataka

July 7th, 2025 – July 7th, 2026 (One Year)

- Completed comprehensive rotation across multiple diagnostic departments: Histopathology, Immunohistochemistry, Cytology, Hematology, Biochemistry, Flow Cytometry, Microbiology, and Phlebotomy
- Acquired advanced proficiency in tissue processing including embedding, trimming, sectioning, and mounting of tissue samples
- Trained in specialized staining techniques and immunohistochemical procedures for disease diagnosis and classification
- Developed expertise in cytological preparation and morphological analysis for pathological assessment
- Gained hands-on experience in histopathological techniques, cytology special staining procedures, immunohistochemistry, microbiology, ID - PCR, haematological analysis, and biochemical testing procedures

- Learned protocol variations across departments and understood importance of standardization in diagnostic procedures
- Demonstrated meticulous attention to detail and maintained laboratory safety standards throughout internship

Intern - Histopathology & Cytology

Aster Reference Lab (Vasanth Nagar), Bengaluru, Karnataka

May 5th, 2024 – June 5th, 2024

- Mastered smearing, staining techniques, and grossing procedures under expert guidance of Mr. Irfan Pasha (Executive)
- Gained proficiency in embedding, trimming, sectioning, and mounting of tissue samples for microscopic analysis
- Understood protocol variations and quality assurance measures employed across different laboratory departments
- Developed comprehensive understanding of tissue preparation workflow from sample receipt to final slide preparation

Intern - Cytogenetics

Kidwai Memorial Institute of Oncology, Bengaluru, Karnataka

November 25th, 2023 – December 10th, 2023

- Learned techniques to identify abnormal chromosomes and understand cytogenetic principles under supervision of Dr. Kavitha and teaching staff
- Trained in preparation of culture media, hypotonic solutions, Carnoy's fixative, and buffer solutions
- Acquired hands-on experience in sample collection, culture setup, harvesting, and slide preparation techniques
- Mastered G-banding methodology and gained proficiency in chromosome observation under microscope
- Participated in seminar conducted by Dr. Kavitha on cytogenetics, reinforcing theoretical knowledge with practical applications

EDUCATION

Bachelor's Degree in Cancer Biology

Jain Deemed to be University (School of Applied Health Sciences), Bengaluru, Karnataka

Current CGPA: 8.23 | Expected Completion: 2025

Comprehensive undergraduate program focused on understanding cancer biology, oncology research, tumor progression, drug development, and diagnostic pathology. Curriculum emphasizes both theoretical knowledge and practical laboratory skills with a focus on real-world applications in patient care.

Pre-High School & Pre-University Education

Carmel Convent Senior Secondary School, Bengaluru, Karnataka

2009 – 2022

LANGUAGES

- Kannada (Fluent)
- English (Fluent)
- Hindi (Fluent)
- Tamil (Basic)
- Urdu (Basic)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Drug Discovery** – University of California San Diego -Coursera Certification
- **Drug Development** – University of California San Diego – Coursera Certification
- **Soft Skills Development** – TCS Certification
- **Introduction to Genomic technologies** – John Hopkins University – Coursera Certification
- **Access Bioinformatics databases with Biopython** – Coursera Certification
- **Building an Ecosystem model with Insight marker** – Coursera Certification
- **Modern arts & ideas** – Museum of Modern Arts – Coursera Certification

EXTRACURRICULAR ACTIVITIES & ACHIEVEMENTS

- Active volunteer at university events; organized and hosted educational and non-educational seminars at Jain University
- Been at Toolo children's library – Part Time Library Assistant
- Dedicated sports enthusiast and member of Jain University Sports Club; actively participates in athletic competitions
- Participant in Cancer-Aware Program conducted by Jain University for community cancer awareness and education
- Three-time participant in Cooking Without Fire competitions in collaboration with Maggie and Nestle; demonstrates creativity and initiative
